

Microsoft Releases Vista Patch

August 28, 2007

Announcement

Microsoft Corporation has recently released a hot fix patch for the Windows Vista operating systems that resolves the issues with AVI file creation. This issue prevented Optec's Media Editor 3 (ME3) from properly exporting AVI files when used in the Windows Vista Environment. Microsoft has confirmed that this is a bug in the Microsoft products that are listed below.

- Windows Vista Home Basic
- Windows Vista Home Premium
- Windows Vista Business
- Windows Vista Business 64-bit Edition
- Windows Vista Enterprise
- Windows Vista Ultimate
