

GAME ON.

Transform an LED display into a dynamic multi-sport scoreboard with M.E. Pro+ -VS. Zone a display for live video feed, full scoreboard functions or a combination of all. It's a game changer.

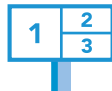

M.E. PRO+ -VS

MEDIA EDITOR PRO PLUS AND VIRTUAL SCOREBOARD SOFTWARE SUITE

MULTI-SPORT FUNCTIONALITY

Display customizable multi-sport scoreboards and score games in real-time.

CONTENT ZONING

Create a variety of content layouts with up to 9 user defined multi-media zones.

CONTENT CREATION

Create, import, layer, edit, manage and preview with intuitive content creation tools.

VISUAL EFFECTS

Utilize a variety of transition effects like scale, rotate, and fade in/out to create dynamic content.

LAYERED CONTENT

Layer content to create messages with impact. Key text over images, animations, and video.

HOT KEYS

Up to 100 available hot keys for instantaneous content playback.

CREATE PLAY LISTS

Create or import/export play lists for one or multiple zones.

SINGLE USER CONTROL

Score, edit, and control a scoreboard with a single user.

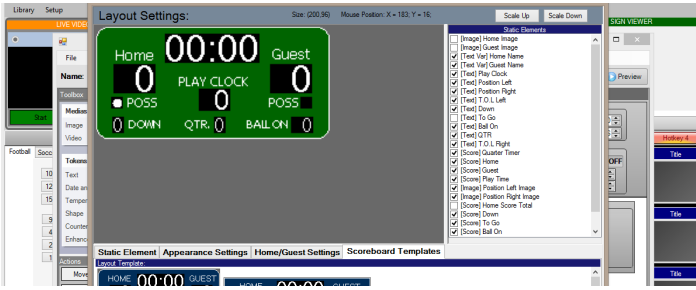

DISPLAY CONTROLS

Control, network, and adjust displays and settings.

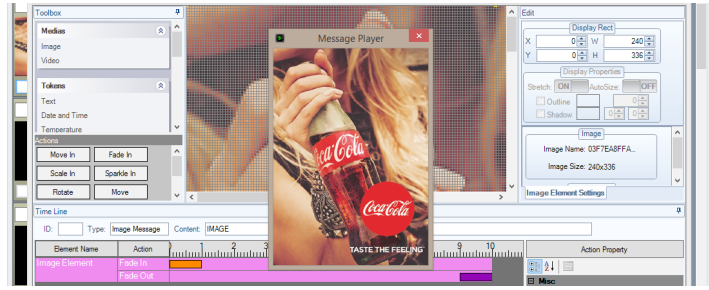

OPERATING SYSTEM

Windows 10, 8, 7 and Vista compatibility.

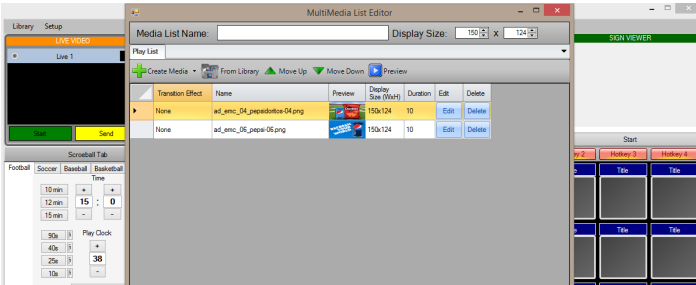

MULTI-SPORT FUNCTION

Create, edit, customize, and preview scoreboard layouts with intuitive content creation tools. Add team logos, colors, and modify each layout to meet league standards. Utilize one LED display for multiple sports.

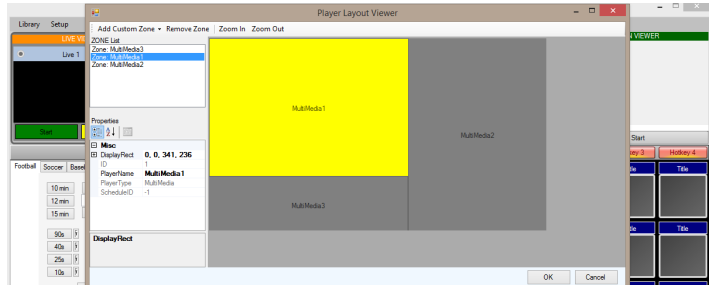

CONTENT CREATION

Create, import, layer, edit, organize and preview with intuitive content creation tools. Manage effects, apps, variable data, and frame duration.

CREATE PLAY LISTS

Create or import/export play lists for one or multiple zones and log playback. Edit and preview play lists. Save individual content files to the content library for future use.

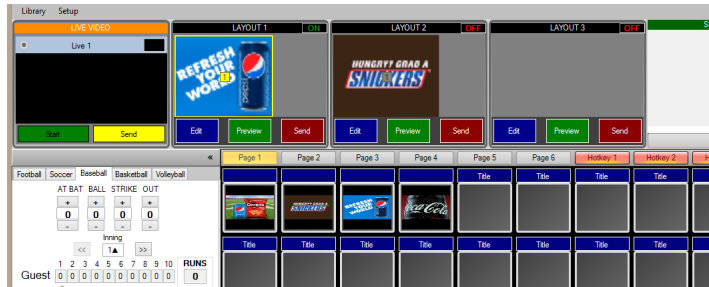

CONTENT ZONING

Create and schedule a variety of content layouts with up to 9 user defined media zones. Mix static, variable, and dynamic content on one display.

HOT KEYS

Create hot keys for instantaneous content playback. Create, edit, and customize each hot key including naming and play duration.

REAL-TIME CONTROL

Monitor live video feed, edit/preview layouts and content in 3 render windows, and monitor live on-display content all while scoring a game.
